RWA

Special Cooling Equipments

SHW

compressed air dryer with water / ice solution

Special cooling equipments

With the experience obtained in over 40 years experience in the market, Fargon designs and manufactures special cooling systems to meet specific applications.

The devices have the same security, quality and technical support offered to other products Fargon and are designed to meet the conditions required by the client project.

Chiller water and liquid solutions

RWA series

- For cooling water and other aqueous solutions (oil, ethylene glycol, etc.)
- Wide capacity range: 0.5 to 75 TR
- Air or water cooled
- Supplied with or without expansion tank
- Refrigerant fluids (R22, R 407C, R 417, etc.)

Compressed air dryer with water / ice solution

SHW series

- Dehumidify the air without the use of fridge fluid
- Ready to be connected to air line / cold water
- Continues operation
- Do not consume electric power
- Capacities from 1000 to 8500 m³ / h
